

Tough birds

fragile homes

Threats to flamingo wetlands...

Climate change alters wetland water levels.

Human disturbance to nesting areas.

Unregulated flying of drones over flocks of birds.

Resource extraction (e.g. mining) degrades habitat quality.

Development of wetlands causes habitat loss.

Unregulated ecotourism.

Climate change alters weather patterns.

Illegal hunting and poaching.

Power lines near wetlands cause bird collisions.

Irrigation of farmland reduces in-flow to lakes that flamingos use.

Pollution run-off.

Invasive species compete for flamingo food items.

Fragmentation of wetlands caused by infrastructure development.
